

# Tech Playland Set Design

**You are the Future!**

Exploring set design today  
makes the architects of  
tomorrow!!!

## **RULES**

- This is a team event of up to 4 participants
- It is a timed event.
- If this event is chosen for the Tech Relay, the best time will be recognized at Closing Ceremonies.
- Read the design prompt. Discuss/plan your attack of the set up.
- Measure and decide which pieces are used as per the prompt on the table.
- Follow proper safety rules and procedures; do not pick up heavy pieces by yourself.
- Set up your scene as per the prompt.
- Keep everything on the blue tarp.
- Take a picture for Eventsential before you strike.
- Return pieces to their starting positions..

## **How to Practice**

One 6' table to assemble participants. One pager from the handbook is printed and taped to the table. 4 feet in front of the table spread on the floor, is our 20 x 40 blue tarp to protect the floor from scrapes as the UIL set is set up and struck. Tape the tarp to the floor. The 32 piece set being used is set along the opposite side of the tarp from the table. The design prompt for the set is taped to the top of the table on the side that is closest to the tarp. You will need a tape measure for this event and will follow the written prompt to assemble the set. You are done with the event when you take a pic of your team on the set and post to our Eventsential. No chairs at this station other than for the teacher.

Needs: 32 piece UIL Set, 20 x 40 blue tarp, black gaff, spike tape, measuring tape
